CONTENTS OF VOLUME 34

Number 1

iii Journal of *Composite Structures* Annual Award

1 Thermal shocks in composite plates: a coupled thermoelastic finite element analysis
N. MUKHERJEE & P. K. SINHA (India)

13 Effect of various approximations on predicted progressive failure in plain weave composites
J. WHITCOMB & K.SRIRENGAN (USA)

21 Low velocity impact damage in composite sandwich beams
C. L. WU (TAIWAN) & C. T. SUN (USA)

29 Parameter estimation of orthotropic plates by Bayesian sensitivity analysis
T. C. LAI & K. H. IP (Hong Kong)

43 A specialized composite plate element for problems of delamination buckling and growth
M. J. PAVIER & M. P. CLARKE (UK)

55 Dynamic response of rectangular plates of composite materials subjected to impact loads
A. CARVALHO & C. GUEDES SOARES (Portugal)

65 Stability of laminated plates using finite strip method based on a higher-order plate theory
W. J. WANG, Y. P. TSENG & K. J. LIN (Taiwan)

77 The static and dynamic axial collapse of fibreglass composite automotive frame rails
A. G. MAMALIS, D. E. MANOLAKOS, G. A. DEMOSTHENOUS & M. B. IOANNIDIS (Greece)

91 Stress analysis of bolted joints in CFRP laminates by half-fringe birefringent-coating technique
WEI-CHUNG WANG & YEONG-MAW SHEU (Taiwan)

101 Damage tolerance of CSM laminates subject to low velocity oblique impacts
S. MADJIDI, W. S. ARNOLD & I. H. MARSHALL (UK)

117 Book Review

Number 2

119 Modeling progressive damage in composites: a shear deformable element for ABAQUS®
T. G. EASON & O. O. OCHOA (USA)

129 Free vibration analysis of thin coplanar rectangular plate assemblies—Part I: theory, and initial results for specially orthotropic plates
N. S. BARDELL, J. M. DUNSDON & R. S. LANGLEY (UK)

145 Free vibration analysis of thin coplanar rectangular plate assemblies—Part II: further results for generally orthotropic plates
N. S. BARDELL, J. M. DUNSDON & R. S. LANGLEY (UK)

163 A note on finite strip buckling analysis of composite plate structures
D. J. DAWE & V. PESHKAM (UK)

169 On boundary value problems of moderately thick shallow cylindrical panels with arbitrary laminations
H. R. H. KABIR (Kuwait)

185 A postprocess method using a displacement field of higher-order shell theory
MAENGHYO CHO & MIN-HO KIM (Republic of Korea)

197 Efficient higher-order shell theory for laminated composites
MAENGHYO CHO, KI-OOK KIM & MIN-HO KIM (Republic of Korea)

213 Nonlinear and postbuckling responses of curved composite panels with cutouts
A. K. NOOR, J. H. STARNES, Jr & J. M. PETERS (USA)

241 Supersonic flutter analysis of thermally stressed laminated composite flat panels
M. GANAPATHI & M. TOURATIER (France)

249 Erratum

Number 3

251 Scattering of SH waves by flaws in sandwich plates and its use in flaw detection
G. R. LIU & K. Y. LAM (Singapore)

263 Analysis of thick hollow composite beams under general loadings
C. KIM & S. R. WHITE (USA)

279 Bending of curved sandwich beams, a numerical approach
S. SMIDT (Norway)

291 Exact elasticity solution for buckling of composite laminates
A. CHATTOPADHYAY & H. GU (USA)

301 Dynamic modelling of a composite plate, a mixed numerical and experimental approach
P. SWIDER, B. LE FICHOUX & G. JACQUET-RICHARDET (France)

309 The nonlinear prebuckling response of short thin-walled laminated composite cylinders in bending
H. P. FUCHS & M. W. HYER (USA)

325 Thermomechanical postbuckling analysis of imperfect laminated plates on two-parameter elastic foundations
HUI-SHEN SHEN, G. SUN (China) & F. W. WILLIAMS (UK)

339 Bonded boron–epoxy composite repair and reinforcement of cracked aluminium structures
T. E. TAY, F. S. CHAU & C. J. ER (Singapore)

349 Free vibration response of multilayered orthotropic fluid-filled circular cylindrical shells
C. B. SHARMA (UK), M. DARVIZEH & A. DARVIZEH (Iran)

357 Letters to the Editor

Number 4

361 A micromechanical analysis to predict the cord–rubber composite properties
R. M. V. PIDAPARTI & A. W. MAY (USA)

371 Scale models for laminated cylindrical shells subjected to axial compression
J. REZAEEPAZHAND, G. J. SIMITSES & J. H. STARNES, Jr (USA)

381 Measurement and theoretical modelling of the damping properties of a uni-directional glass/epoxy composite
A. S. HADI & J. N. ASHTON (UK)

387 Accurate free vibration analysis of clamped antisymmetric angle-ply laminated rectangular plates by the Superposition–Galerkin method
D. J. GORMAN & WEI DING (Canada)

397 Engineering analysis of buckling of delaminated beam plates
J. TING-SHUN WANG (Germany) & CHIEN-CHANG LIN (ROC)

409 Detection of flaws in sandwich plates
Y. Y. WANG, K. Y. LAM & G. R. LIU (Singapore)

419 Analysis of composite laminates with transverse cracks
T. E. TAY & E. H. LIM (Singapore)

427 Stress distributions in multi-fastened composite plates
A. P. BLACKIE & S. CHUTIMA (UK)

437 Bending analysis of antisymmetric angle-ply laminated plates including transverse shear effects
JI-FAN HE & ZHI-ZHOU ZHANG (PRC)

445 Book Review
